ADC STEPS

STEPS TO USE ADC

1. Set ADC clock prescalar (default: disabled (No conversion))

2. Define VREF (default: Externally supplied ref. Voltage)

3. Select Analog channel (default: PC0)

4. ADC mode (single conversion vs auto-triggered)

5. Interrupt to call when ADC completes (optional)

6. Other options: 8-bit mode, power-safe, etc.
